LOT 355 - Crash-Tested Small Dog Car Seat for Safety

Description

Brand: pawwincor Condition: Open Box - Not Tested In Packaging?: Yes Assembly Required?: No Damaged?: No Functional?: Yes Missing Parts?: No Model: CTCS1 Star Rating: 0.0 Title: \$116 Crash-Tested Small Dog Car Seat for Safety CRASH-TESTED : Our dog car seat has been independently crash-tested in the USA by the Center for Pet Safety (CPS) for pets weighing up to 25 lbs. It has received a 5-star safety rating for its outstanding performance (Test with the U.S. child restraint system standard FMVSS 213b). The test results show nearly no movement during crashes, making it one of the safest dog car seats for small dogs and cats in the world. SAFEST DESIGN : 99% of dog booster car seat or car seat for dogs on the market are not crash-tested, their open structure and inner leash often fail to protect your pets safely during car accidents. In most cases, the inner leash of their dog carseat will break and your dogs could be thrown around during accidents. In contrast, our crash-tested dog car seat relies on the seatbelt and the car seat itself to absorb crash forces, rather than depending on the inner safety tether that most companies use. This design allows us to withstand crash forces of at least 750 lbs, placing us in the top 1% of dog car seats that can truly

safeguard your pets. Top Cover Protection: Unlike most dog boosters with an open structure, our enclosed dog car seat features a top cover design that prevents dogs and cats from being thrown around or hitting the side door or front seat during car accidents, helping to keep them safely inside the car. In crash tests conducted by the Center for Pet Safety, none of the dog boosters with open structures passed, as the tested dogs were thrown around in the car, either due to inadequate inner safety tethers or being ejected because of the open design. HOME PET BED : It not only can be used as a cat car seat or dog bed for car, but also a comfortable cat bed at home for small dogs and cats. They can walk in and out of the carrier when the front mesh is open. PORTABLE : This is a portable car seat for travel (dog travel) , you can use it as portable dog carriers for small dogs and cats for short term vet visits or overnight dog camping, or bring this puppy car seat home to be a home dog bed or cat beds. CAT-FRIENDLY : With the mesh cover, it can be used as a cat car seat, ensuring your cats feel safer inside the carrier compared to an open cat car seat. It also helps reduce travel stress by using it as a cat bed at home first. Perfect for using as a cat carrier for vet visits for nervous cats.

Quantity: 1
